

# LEVEL 2

Shady Businessman: Multiple rounds of a tournament will be held. You need to tell me the state of a tournament after two rounds.

**Your task:**

For each tournament determine the styles of the fighters that are still in the tournament after two rounds.

- Each tournament is a [single-elimination tournament](#). You are given the matchups of the tournament's first round. The winners of the first round will compete against each other in the second round
- Just like in level 1, the winners will be determined only by their fight style
- For each tournament determine the state of the tournament after the second round

	Input	Output
Format	N M fightingStyles	fightingStyles (repeated N times)
Types	N (int): number of tournaments M (int): number of fighters in the tournament (will always be a power of 2) fightingStyles (string): M chars, representing the styles of the fighters	fightingStyles (string): the styles of the participants that are still in the tournament after two rounds
Example	3 8 PRRRSSSR PSRPPSP PPPSRSP  <i>The first tournament 'PRRRSSSR' can be seen in the diagram on the previous page.</i>	PR SS SP
